Dayville, Killingly Central School
COMPARE - IT PROGRAM

Compare-it is a professional development process developed at Killingly Central School, a United States Blue Ribbon Elementary School, in Dayville. The acronym describes the on-line and face-to-face process of COnnecting, Modeling, PrActicing, and Reflecting with Integrated Technology. The Technology Coordinator, Verna Sodano-Richards, collaborates, models and reflects with teachers.

* **Empowerment** was the backbone of receiving a Connecticut Principals' Award. The **focus on student achievement** encouraged all members of the community to offer and see their ideas to fruition.

Encourage diverse and culturally competent learning communities to increase student achievement. Experience includes multicultural arts magnet school and a leadership academy centering on social justice.

High scorers:
Parental role,
motivation of
students crucial

21st Century Student Centered Curriculum Geared toward Mastery

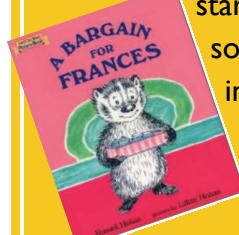

*

It changed minds in that we, as a country, need to take notice of our young people. Your students' work with LifeList illustrated that our teens are dynamic and bold individuals with enough creativity and determination to truly make a difference. Your students taught us that one is never too young to change the world, never too young to change someone's life. I salute each and every surfer in your class and offer my deepest thanks for their diligence and dedication.

Students' business card used for buddy tutoring and creating *learning objects for teachers.

A Bargain for Frances as a starting point for social learning. Responsive Classroom's interactive modeling method used for invitations, etiquette; and an intergenerational tea with discussion to critically analyzing the text.

During Hurricane Katrina, students created a service learning project using their technical research skills locating missing family members who called the Lifelist organization.
